E-Mail: jjones@marlboroughct.net

NOTICE TO MARLBOROUGH RESIDENTS

During the month of July, we will again be applying herbicide to guide rail areas throughout the Town for vegetation control. Since these areas are difficult to mow using conventional methods, herbicide application will reduce roadside mowing man-hours.

The products used for this purpose will be a combination of Dupont Oust XP, Dupont Oust Extra, Garlon 4, and Riverdale Razor Pro.

The product application field representatives are overseen by certified and licensed specialists, scientists, agronomists, and horticulturists.

If you have any concerns or would rather we did not apply herbicide to your area, please call the Public Works Department at 295-6229.
